*Maximum heat output is based on two fires per day, at least 10 hours apart.

Measurements in inches are rounded; please refer to construction drawings for exact measurements in millimeters.

Delivery and on-site assembling are not included in Price. Heat shields, hearth tiles, benches & other accessories are available as optional features.

Tulikivi heaters require appropriate structural support. Being a naturally occurring material, soapstone can vary in aspect and weight.

5 years Warranty. Tulikivi heaters are UL/ULC safety tested & listed and must be assembled by a Tulikivi installer. EPA certification is not required.

Chimney: 20' minimum height from floor for models with bakeovens, 15' otherwise. Recommended flue dia.: 6" or 7" for small models, 7" or 8" otherwise.

Clearances to combustibles: 20" to back, 14" to sides, 10" to top and 48" to front. Can be reduced to 3" with a UL/ULC specified heat shield.

Floor protection: non-combustible material at least 3/8" thick, extending 8" from sides, 8" from back (unless a heat shield is used) and 16" from front.

Warm regards,

Tulikivi
